Student Workbook

Dear Learner,

With great pleasure we present neo+™, Nexgen's new Al-driven, next generation English language course. Powered by DynEd, neo offers a unique 5-step approach proven to help English learners reach their fluency goals much faster than with traditional teaching methods.

neo's skill levels are based on the Common European Framework of Reference for Languages (CEFR) and lead to internationally recognized Certificates from DynEd International, Inc. which rely on the careful assessment of your progress over time, not simply on the results of a single, high-stakes exam.

This workbook provides written exercises designed to reinforce neoStudy, the web and mobile-based program at the A1+ to A2 level. The more of these complementary exercises you complete as you study with neo, the faster you will progress.

Good Luck!

1.	Which is the largest planet in the solar system?
2.	How many planets are there?
3.	How far from the sun is the Earth?
4.	Look at the picture and indicate which planets are closer to the sun than the Earth?
5.	What is the closest planet to the sun?
6.	What is the difference between a planet and a moon?

Exercise K

Solar Systems & Planets

Can you remember the order of the planets?

There are many easy ways to remember the order of the planets. One of them is using mnemonics phrases. A mnemonic aid is a trick to help you remember something.

This is an example:

"My Very Easy Method Just Speeds Up Names"

Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, Neptune

The first letter of each of these words represents a planet - in the correct order. Here are other examples:

My Very Educated Mother Just Served Us Nine.

Mom Visits Every Monday, Just Stays Until Noon.

My Very Eager Mother Just Served Us Noodles.

Now it's your turn!

Remember: It is a mnemonic phrase because the first letter of each word is the same as the first letter of each planet.

In pairs or small groups make up your own mnemonic phrases to help you remember the planets and their order in the solar system.

Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, and Neptune

Exercise L

Asserting Existence

Make sentences, questions and answers using "there are" and "there is" as a way to refer to the existence or presence of someone or something.
